

Prompts de video — Vector Plano Moderno (10s, diálogo en inglés)

Comercio, Viajes y Uber — con diálogo ambiental indistinto EN INGLÉS, sin subtítulos

Estilo base repetido en cada prompt: modern flat vector 2D cartoon animation style, bold clean geometric shapes, minimal flat color blocking with subtle soft drop shadows for depth, smooth simplified character design with natural human proportions, crisp clean linework, contemporary motion-graphics / explainer-video aesthetic, smooth easing animation transitions, muted-but-vibrant modern color palette, 10 seconds long, no text on screen, no subtitles, no captions. Characters speak with soft, warm, indistinct mumbled dialogue in English — using English speech rhythm, intonation, and phonetic sounds (not any other language, not gibberish unrelated to English), friendly conversational tone, no clear or fully intelligible words, like overheard English chatter in the background — matching their mouth movements and gestures naturally.

⚠ **Nota:** si la IA sigue generando el murmullo en otro idioma, añade explícitamente al final del prompt: *“spoken language: English only”* — algunos modelos de video necesitan esta instrucción directa además de la descripción de estilo.

COMERCIO

1. Comprando un vestido

“A modern flat vector 2D cartoon animation, 10 seconds long, depicting a boutique clothing store. A young woman browses a rack of dresses as a shop assistant approaches with a welcoming gesture, speaking in soft indistinct English-sounding friendly chatter. The woman replies with a few indistinct words, gesturing toward the dresses. The assistant points toward a fitting room area, still murmuring warmly in English-sounding tones. Moments later, the woman steps out wearing an elegant dress, turning happily in front of a mirror, exclaiming something indistinct and pleased with a thumbs up. Bold clean shapes, flat color blocking in soft pastel and warm tones, subtle drop shadows, smooth motion-graphics style camera pan following the woman from the rack to the mirror, no text, no subtitles. Notas de uso

1. **Duración:** todos los prompts están ajustados a 10 segundos, encajando mejor con los límites de duración de la mayoría de generadores de video con IA (Veo, Runway, Kling, etc.).
2. **Diálogo indistinto:** los personajes hablan de forma audible y natural (con ritmo conversacional real), pero sin palabras reales o inteligibles — útil para que el video tenga vida y sonido ambiental sin depender de subtítulos ni de que la IA genere texto o diálogo exacto (que suele fallar o sonar robótico).
3. Si luego quieres añadir diálogo real, puedes doblarlo tú mismo en post-producción sobre este audio ambiental, o sustituirlo por música/narración.
